
SUMMARY

Analytics professional with 8+ years of experience translating complex business and operational data into strategic decisions. Experienced in SQL, Tableau, forecasting, KPI frameworks, scenario modeling, and statistical analysis, with a track record of building scalable reporting systems and supporting resource allocation and executive decision-making.

WORK EXPERIENCE

- Product Strategy Analyst**, LINE Plus Corporation, Taipei, Taiwan Oct 2021 – May 2025
- Identified reporting gaps and designed automated SQL pipelines and Tableau dashboards to track KPIs, eliminating 20 team-hours/month and enabling real-time monitoring and status reporting for 20+ stakeholders
 - Partnered with Finance to model annual demand forecasts, headcount plans, and resource allocation scenarios; presented KPI analysis to C-level executives through data-driven narratives
 - Designed a value-based pricing framework for customized advertising packages by modeling customer value, pricing guardrails, approval logic; reduced quote turnaround from weeks to minutes, supporting >40% YoY revenue growth
 - Redesigned Official Account pricing strategy using behavioral and spending segmentation to identify pricing friction across the customer lifecycle, improving onboarding conversion and progression; doubled annual sales growth
 - Built predictive models (Python) to improve ad targeting performance; designed and analyzed A/B experiments that doubled CVR across pilot campaigns, increasing advertiser ROI and platform advertising spend
- Senior Research Executive**, Ipsos, Taipei, Taiwan Sep 2019 – Sep 2021
- Applied Ipsos Bayes Nets (IBN) to model relationships between campaign activities and brand KPIs (e.g., consideration, purchase), identifying key drivers and quantifying their contribution to business outcomes
 - Designed pricing and brand research studies using Van Westendorp price sensitivity analysis, conjoint analysis, regression, and experimentation to guide pricing, positioning, and investment decisions for enterprise clients
- Researcher**, KPMG – Climate Change and Sustainability Consulting, Taipei, Taiwan Jul 2016 – Apr 2018
- Synthesized ESG data into executive-ready briefs and strategic recommendations for C-level stakeholders
 - Modeled sustainability risks across client value chains under extreme-weather scenarios, translating scenario analysis into strategic product development recommendations

PROJECTS

- GenAI PM Automation System** (Claude API, RAG, Python) Apr–Jun 2026
- Architected end-to-end GenAI system automating analytical workflows including issue triage, KPI monitoring, and stakeholder updates via Claude API and RAG; implemented human-in-the-loop governance
- Fan CRM Scoring - Dallas Trinity FC (Capstone)** (XGBoost, scikit-learn) Apr–Jun 2026
- Built predictive CRM models for retention, loyalty propensity, and customer segmentation using XGBoost and SHAP, integrating multi-source behavioral data and delivering actionable fan scores to senior marketing leadership

EDUCATION

- University of California, San Diego – Rady School of Management** San Diego, CA
M.S. in Business Analytics | November 2026 GPA: 3.9/4.0
Relevant Coursework: Customer Analytics, Marketing Analytics (Bayesian Statistics), Causal Inference & Experimentation, Machine Learning, Deep Learning (Python), Statistical Inference, GenAI in Business, SQL & ETL, Scalable Analytics
- National Taiwan University** Taipei, Taiwan
B.B.A. June 2016

SKILLS

Programming: Python (pandas, scikit-learn), SQL (PostgreSQL, CTEs, window functions), R, Git
Data & BI: BigQuery, Snowflake, PostgreSQL, AWS S3, PySpark, Airflow, Tableau, Excel, ETL
AI: Generative AI, RAG, Claude API, prompt engineering
Analytics: KPI frameworks, forecasting, scenario modeling, statistical modeling, hypothesis testing, A/B testing, segmentation, executive storytelling
