EDUCATION

University of California San Diego – Rady School of Management **San Diego, United States**
Master of Business Analytics 07/2025 –
- Selected Coursework: SQL & ETL, Python, Analyzing large data, Recommender System, Business Analytics (Statistical Inference), Customer Analytics, Deep Learning, Scalable Analytics

National Taiwan University **Taipei, Taiwan**
Bachelor of Business Administration 09/2012 – 06/2016
- Selected Coursework: Calculus, Statistics, Economics, Game Theory, Financial Management, Financial Statement Analysis

Nanyang Technological University **Singapore**
Exchange Student in Nanyang Business School 08/2014 – 05/2015
- Selected Coursework: Wealth Management, Technology in Financial Services, Negotiations

WORK EXPERIENCE

LINE Taiwan Limited – Corporate Business **Taipei, Taiwan**
Product Strategy Analyst 10/2021 – 05/2025
- Designed automated Tableau dashboards and SQL pipelines; improved reporting efficiency by 20 team-hours/month
- Conducted clustering analysis to optimize pricing for key products (Official Account); doubled annual sales growth
- Led predictive model (Python) development for ad-targeting; A/B test improved CVR 2x across pilot campaigns
- Presented KPI analysis to C-level executives through dashboards/reports, guiding sales strategy and risk management
- Created pricing frameworks and strategic guidelines for customized ad packages; drove >40% YoY sales growth

Ipsos Taiwan **Taipei, Taiwan**
Senior Research Executive 09/2019 – 09/2021
- Applied data modeling and statistical testing (t-test, regression) to optimize marketing mix and brand messaging
- Integrated social media analytics (sentiment analysis) with quantitative analysis (using SPSS and Excel); insights revitalized a global F&B account, driving 120% YoY investment growth
- Supervised a team of 3 to design research and generate actionable recommendations adopted by client stakeholders

KPMG Taiwan – Climate Change and Sustainability **Taipei, Taiwan**
Researcher 07/2016 – 04/2018
- Conducted large-scale analysis of 200+ international climate policies, producing insights for 6 key energy sectors
- Synthesized complex ESG performance data into executive-ready briefs for C-level stakeholders
- Collaborated with international experts to develop long-term risk assessment indicators and monitoring mechanisms tailored for regional infrastructure projects
- Diagnosed sustainability risks of client's value chains in extreme weather events; informed strategic planning and product development

PROJECTS

Rady, UCSD: Clothing Fit Recommendation System (Python) 11/2025
- Built a Python-based hybrid logistic regression recommender using user/item metadata and TF-IDF review text, achieving 0.855 AUC and 97.9% Precision@1 in clothing fit prediction.

Rady, UCSD: Weather Impact on Sales (Python, Snowflake, Postgres) 08/2025
- Developed a Python-Snowflake ETL pipeline integrating NOAA weather data with sales datasets; applied statistical models to assess demand shifts, identifying seasonal trends impacting revenue by up to 12%.

SKILLS AND LANGUAGES

- **Business & Research Analytics:** International Policy Analysis (Energy), Infrastructure Risk Assessment, Social Listening Research, Text-Based Analysis, Experimental Design
- **Data Analysis Tools**: Excel, Tableau, SQL, Snowflake, Python (Pandas, Polars, Scikit-learn)
- **AI-Enhanced Workflow**: Proficient in using LLMs and Perplexity AI for high-speed info collection
- **Statistical Techniques & ML:** Hypothesis Testing, A/B Testing, Predictive Analysis, Ensemble Methods, Deep Learning (MLP, CNN, RNN), Time Series Modeling, Unsupervised Learning
